Profile

Software Developer with hands-on experience building web and mobile products from concept to deployment. Strong foundation in React, TypeScript, Python, FastAPI, TailwindCSS, and Firebase, with a focus on responsive design, clean user experiences, and reliable performance across devices. Built client websites, full-stack applications, and an in-development mobile app called Huddle, a shared space for couples that combines daily prompts, chat, planning tools, and memory features. Self-motivated, adaptable, and comfortable learning new tools quickly.

Professional Experience

10/2024 – Present
Bentonville, AR

Web Developer

Self Employed

- Built responsive websites and web applications for clients and personal projects using modern frontend and backend tools.
- Managed projects from planning and design through development, testing, deployment, and iteration.
- Focused on usability, mobile responsiveness, and clean presentation to deliver polished client-facing products.
- Worked directly with project requirements and turned ideas into functional, production-ready websites.

10/2023 – 01/2026
Miami, Florida

Software Developer

MByte Solutions

- Wrote and maintained clean, efficient code for web projects and software features.
- Tested interfaces and resolved bugs to improve reliability and user experience.
- Collaborated with team members to deliver stable and high-performing solutions.
- Supported development tasks across implementation, debugging, and quality improvements.

Projects

Huddle Marketing Website

<https://gethuddled.com>

- Designed and developed the marketing website for Huddle to clearly communicate the product, its features, and its brand.
- Built a responsive user experience focused on clarity, warmth, and product presentation.
- Structured messaging around daily rituals, shared planning, and couple-focused engagement.

Huddle — Mobile App for Couples (In Development)

React Native, Expo, Firebase

- Building a cross-platform mobile app designed to help couples stay connected through small daily rituals and shared tools.
- Implemented product features centered around daily questions, shared chat, weekly quests, calendar, wishlist, gallery, and collaborative canvas functionality.
- Designed the app around engagement, emotional UX, and practical shared utilities in one product experience.
- Working on scalable app architecture and future monetization support using modern mobile development tools.

PDM Immigrations Website

<https://pdmimmigrationsvc.com>

- Built a professional and responsive website for an immigration services business.
- Organized content to make services and legal information clearer and easier to navigate.
- Focused on accessibility, presentation, and user experience for a client-facing service business.

Education

Associate's degree, Computer Science

Miami Dade College

- Pursuing an Associate's degree in Computer Science.

Full Stack Web developer

Miami Dade College 

- Mastered JavaScript, React, and full-stack development techniques.

JavaScript Algorithms and Data Structures Certification

Freecodecamp

- Learned Object-Oriented Programming (OOP), Functional Programming, and algorithmic thinking. Gained hands-on experience with API data fetching.

Telecomunications engineering

Technological University of Havana "José Antonio Echeverría", CUJAE

- Built a foundation in signal processing, networks, and electronics, with hands-on project experience.
